THE HIMALAYAN SOURCING MANIFESTO

VOLUME 2026 • ESSENTIAL WHOLE FOODS

OUR COMMITMENT TO PURITY

Rooted in High-Altitude Himalayan Glaciers & Organic Terraces

Founded in Kathmandu, Nature's Mud was created to reconnect modern households with the untamed nutritional power of the Himalayas.

We partner directly with over 180 smallholder farming families across remote valleys—from the alpine orchards of Jumla (2,400m) and the sheer granite cliffs of Mustang (2,800m), to the fertile organic alluvial plains of Dang and Chitwan.

Every botanical in this catalog is single-origin, traceable to its harvesting cooperative, and dehydrated at low temperatures (strictly below 42°C). This gentle solar airflow preserves delicate phytochemicals, live bromelain and papain enzymes, and heat-sensitive antioxidants that are ordinarily destroyed in commercial high-heat kilns.

We reject all artificial food additives, preservatives, synthetic colors, and industrial processing. What you receive is pure, living mountain nourishment—straight from pristine soil into your kitchen.

' THE 4 PURITY PILLARS

1. 100% Traceable Single-Origin Harvest
2. Sub-42°C Cold Solar Enzyme Retention
3. Zero Chemical Preservatives or Synthetic Sulfur
4. Food-Grade UV-Resistant Glass & Multi-Barrier Packaging
